

Loos Machine & Automation, in business over 100 years, provides engineering, machining, welding, fabricating, and automated turn-key services. We are a leading manufacturer in the food process industry. Loos Machine & Automation specializes in custom automated food process equipment for the meat, poultry, dairy, and pizza industries. We have an expanded engineering department that can custom design equipment to fit our customer's exact needs. Our shop is equipped with high tech machines to keep with the changing times; including a Laser Cutter, CNC Turning Centers, CNC Machining Centers, and CNC Press Brakes. Loos Machine & Automation has designed and fabricated equipment for many local companies as well as companies throughout the United States. We also export equipment to several foreign countries.

From concept to completion, we continually strive to better serve your company's expanding needs!

Renewable Fuel System Tanks

Renewable Fuel System Tanks

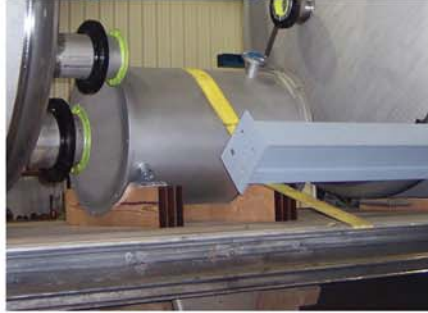

At Loos Machine & Automation, we are constantly striving to expand our services and better meet our customers needs. We manufacture equipment for biodiesel plants and biodiesel processors making biodiesel fuel as well as ethanol plants and ethanol stills making ethanol fuel.

Loos Machine & Automation fabricates these Non Code Atmospheric Pressure Stainless Steel alternative fuel systems completely in-house. Our large shop area allows us to construct large equipment like this with ease.

Loos Machine & Automation has manufactured alternative fuel tanks as small as 24" OD x 36" Tangent to Tangent like this Hotwell Tank; shown here nestled between two larger tanks for shipping.

Or tanks as large as 132" OD x 283.5"

Tangent to Tangent such as the Palm Oil Crystallizer Tank in this photo.

Our customers, sometimes require the use of SS CIP Tanks and Skids to complement their renewable fuel systems.

Some of the various projects we have completed for customers include:

Agglomeration Tanks
Biodiesel Filtrate Receivers
Biodiesel Precoat Tanks
Biodiesel Body Feed Tanks
Bleaching Slurry Tanks
Caustic Mixers
CIP Tanks & Skids
Concentrate Tank Weldments
Cyclone Weldments
Degumming Neutralizing Reactors
Filtrate Receivers
Heavy Phase Receivers
Hotwells
Neutralizing Reactors
Palm Oil Crystallizer Tanks
Precoat Tanks
Pretreatment Filtrate Receivers
Pretreatment Precoat Tanks
Pretreatment Reactor Tanks
Pretreatment Slurry Tanks
Silica Slurry Tanks
Slurry Tanks
Soap Stock Receivers
Soft Water Tanks
Vacuum Dryers, and
Waste Water Surge Tank Weldments

Please call us for all of your Alternative Fuel System needs.
