

Loos Machine & Automation, in business over 100 years, provides engineering, machining, welding, fabricating, and automated turn-key services. We are a leading manufacturer in the food process industry. Loos Machine & Automation specializes in custom automated food process equipment for the meat, poultry, dairy, and pizza industries. We have an expanded engineering department that can custom design equipment to fit our customer's exact needs. Our shop is equipped with high tech machines to keep with the changing times; including a Laser Cutter, CNC Turning Centers, CNC Machining Centers, and CNC Press Brakes. Loos Machine & Automation has designed and fabricated equipment for many local companies as well as companies throughout the United States. We also export equipment to several foreign countries.

From concept to completion, we continually strive to better serve your company's expanding needs!

Industry**

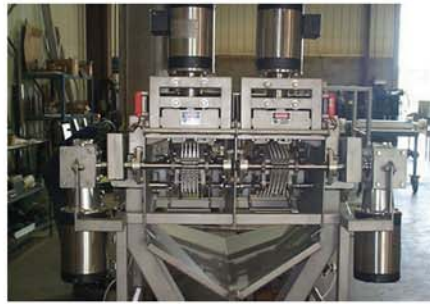

Specialty Equipment for the Meat & Poultry Industries

At Loos Machine & Automation, we listen to our customer's needs and equipment challenges. Our Engineers will work with you to find an economical solution to the issues at hand. We fabricate a wide variety of equipment for the Meat & Poultry Industries.

One such piece of equipment is our SS Beef Stick Cutter for use in snack food industry applications.

Many of our customers enjoy the benefits of our sanitary conveyor designs for their (RTE) Ready-to-Eat rooms.

Loos Machine & Automation also manufacture SS Knuckle Cutters; like the one pictured here, & SS Neck

Cutters, shown below, for the Poultry Industry. These Cutters can be used for either chicken or turkey, they are both built to withstand daily heavy-duty application in a continuous work environment. Our Knuckle and Neck Cutters are designed for easy clean up and sanitation procedures.

Our Stainless Steel Scale Tables have a convenient drop down section for the

placement of the scale, making for quick and easy weighing of your product.

Loos Machine & Automation manufactures our Declumpers for uses in many industries, including Meat & Poultry. Declumpers are used for breaking up frozen product, among other things.

Some of our Specialty Equipment Includes:

SS Beef Jerky Slicer / Stripper

Waste Water Separator Conveyor

Many of our Meat & Poultry Customers find our Stainless Steel Screw Conveyors and Stainless Steel Augers to be very useful in their applications.
